

# LAKE DECT Handset

The LAKE DECT handset is a premium DECT handset, which has been designed to integrate with the onboard DECT base station on the LAKE Sigma.

## Features and Benefits

- 5 line full colour Display
- Message Waiting Indicator
- Backlit keypad and Display
- Volume control
- Headset Jack: Supports an external headset. Ideal for receptionists and other users who spend most of their time on the phone
- Full Duplex Hands free: Offering superb audio quality, allowing you to carry on a conversation without having to pick up the phone.
- CLI Support: Can tell you who is calling. It will show the caller's number or extension and for callers listed in the system directory, it can also display the caller's name.
- 100 Name private phone directory
- Access to 100 name Sigma System directory
- External Ring Tone
- Internal Ring Tone
- Choice of 5 ring tones
- Choice of 5 wallpapers
- 'SERVICES' key with direct Access to Sigma PABX features such as Voicemail, PSTN line Access, VoIP line Access, Call pickup and Divert.
- 'INT' key with access to the internal extension list.

**Other frequently used features:** Saved number redial, Hold, Transfer, Conference, Do not disturb, Divert calls, Call pickup, Reminder call and Missed calls log.

## Is it for you?

*Looking for a phone that is as versatile as you are?*

Designed for smaller businesses, LAKE DECT handsets have an intuitive, menu driven user interface that makes each phone extremely easy to set up and use.

There's no need for training and every user is able to set their phone up to make the most of the system's many call handling features.

## How it works

LAKE DECT operates with the onboard DECT base station on the LAKE Sigma and are powered by the system itself.
